Company Representative at the 23rd World Mining Congress:

Darren Honaker, Mining Industry Leader

Paul Cowx, Technical Sales Manager

Company Profile:

TMEIC is built on the combined and proud heritage of Toshiba and Mitsubishi-Electric in the industrial automation, control and drive systems (electric motors and electric drives) business. TMEIC's global business employs more than 2,200 employees, with sales exceeding U.S. \$2.4 billion, and specializes in mining, metals, oil & gas, material handling, utilities, cement, paper and other industrial markets.

Product Line(s):

TMEIC has a long history of providing electrical control systems for the mining industry, specializing in electric motors and electric drives. TMEIC provides solutions for draglines, shovels, and blast-hole drills all over the world. For mineral processing, TMEIC has installed several hundred systems for the processing of ore, minerals, rocks, and coal worldwide. TMEIC specializes in severe duty application such as SAG mills, conveyors, crusher, separators, feeders, weigh stations, pumps, mine hoists, and many more. Maximum uptime and long-term reliability are critical to all applications in surface and underground mining. TMEIC electrical products with superior engineering design, manufacturing methods, and construction excel in demanding mining applications.

Objectives(s) at the 23rd World Mining Congress:

TMEIC would like to contact Canadian and international mining companies and other end-users in the mining industry.
